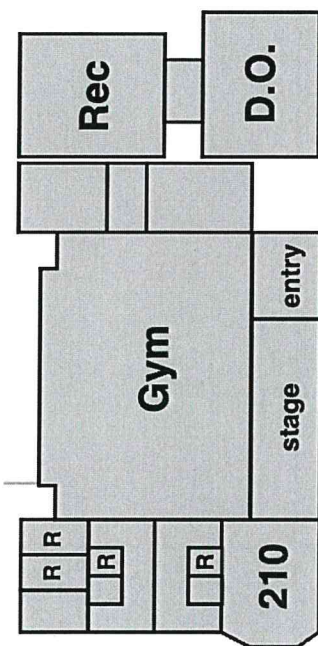

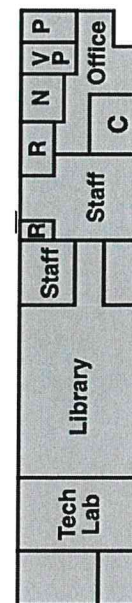

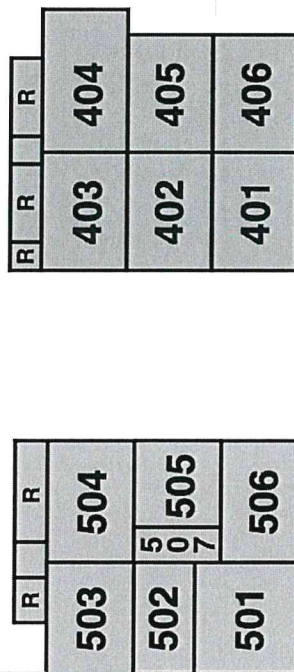

Diagram illustrating a 3D memory stack structure with 10 slots. The stack is divided into two main sections. The top section has three columns: the first column contains 'R' and 'R' in the top two slots; the second column contains '601', '602', '603', '604', and '605' in the bottom five slots; the third column contains '608', '607', and '606' in the top three slots. The bottom section has two columns: the first column contains '609' and '610' in the top two slots; the second column contains '608', '607', and '606' in the bottom three slots. A horizontal bar separates the two sections.
