

CURRICULUM DEVELOPMENT AND EVALUATION

The Board of Trustees desires to provide a research-based, sequential curriculum which promotes high levels of student achievement and emphasizes the development of basic skills, problem solving, and decision making. Upon recommendation of the Superintendent or designee, the Board shall adopt a written district curriculum which describes, for each subject area and grade level, the content objectives which are to be taught in all district schools.

The district's curriculum shall be aligned with the district's vision and goals for student learning, Board policies, academic content standards, state curriculum frameworks, state and district assessments, graduation requirements, school and district improvement plans, and, when necessary, related legal requirements.

The Superintendent or designee shall establish a process for curriculum development, selection, and/or adaptation which utilizes the professional expertise of teachers, principals, and district administrators representing various grade levels, disciplines, special programs, and categories of students as appropriate. The process also may provide opportunities for input from students, parents/guardians, representatives of local businesses and postsecondary institutions, and other community members.

The selection and evaluation of instructional materials shall be coordinated with the curriculum development and evaluation process.

When presenting a recommended curriculum for adoption, the Superintendent or designee shall provide research, data, or other evidence demonstrating the proven effectiveness of the proposed curriculum. He/she also shall present information about the resources that would be necessary to successfully implement the curriculum and describe any modifications or supplementary services that would be needed to make the curriculum accessible to all students.

The Board shall establish a review cycle for regularly evaluating the district's curriculum in order to ensure continued alignment with state and district goals for student achievement. At a minimum, these reviews shall be conducted whenever the State Board of Education adopts new or revised content standards or the curriculum framework for a particular subject or when new law requires a change or addition to the curriculum.

In addition, the Board may require a review of the curriculum in one or more subject areas as needed in response to student assessment results; feedback from teachers, administrators, or parent/guardians; new research on program effectiveness; or changing student needs.

CURRICULUM DEVELOPMENT AND EVALUATION**Curriculum Development/Selection Process**

The Superintendent or designee shall research and identify available curriculum in the subject area(s) and grade level(s) scheduled for review. He/she may select a limited number of programs to present to the curriculum review committee for evaluation.

The committee shall recommend the curriculum that best meets the district's needs based on the following criteria and any additional factors deemed relevant by the committee:

1. Analysis of the effectiveness of the existing district curriculum for all students, including student achievement data disaggregated by grade level and student population
2. Alignment of the proposed curriculum with expectations established by the Board and the State Board of Education as to what students need to know and be able to do in the subject(s) and grade level(s) under consideration
3. Evidence of proven effectiveness of the proposed curriculum in raising student achievement, including the research and learning theory upon which the curriculum is based
4. Applicability and accessibility of the curriculum to all students, including, but not limited to, underperforming students, students with disabilities, English learners, and gifted and talented students
5. The estimated cost to purchase, adapt, and/or develop the curriculum
6. Resources required to implement the curriculum, such as time, facilities, instructional materials and technology, staffing, staff development, and funding
7. If the curriculum includes instructional materials, the extent to which the materials meet criteria established by law and the district
8. Any potential impact on other parts of the educational program

If it is determined that available prepackaged curriculum is not cost effective or is inadequate to meet the needs of the district's students, the Superintendent or designee may adapt curriculum or develop new curriculum. Curriculum modification or development shall be performed by teachers, school administrators, and district administrators, with support and assistance, when available, from curriculum experts from the county office of education, postsecondary institutions, and/or curriculum or professional associations. Any modified or new curriculum shall be reviewed by the curriculum committee in accordance with the above criteria prior to being recommended to the Board.

Upon approval by the Board, a new curriculum may be implemented in a limited number of schools or classrooms on a pilot basis so that modifications may be made as necessary before implementing the curriculum districtwide.
